

Errata: On the Cramér-Rao bound for polynomial phase signals

R. McKilliam and A. Pollok

April 28, 2014

The equation

$$q_{si} = \frac{(-1)^{s-i}}{s!} \begin{bmatrix} s+1 \\ k+1 \end{bmatrix}$$

for the coefficients of the integer valued polynomials should read

$$q_{si} = \frac{(-1)^{s-i}}{s!} \begin{bmatrix} s+1 \\ i+1 \end{bmatrix}.$$
